

Novel Coronavirus: Medical Capacities Review Survey for All Global UN Duty Stations

This survey was developed by the Public Health unit of the Division of Healthcare Management and Occupational Safety and Health (DHMOSH). Its aim is to better understand existing medical capacities as it relates to novel coronavirus (2019-nCoV) diagnosis and response.

The information collected will help DHMOSH identify main gaps in medical capacities to handle severe acute respiratory infections in duty stations, perform risk assessments and plan for additional response actions. Questions in this survey were adapted from WHO's National Capacities Review Tool for nCoV. For any questions, contact dos-dhmosh-public-health@un.org.

If needed, please be sure to contact your local WHO office for assistance in completing this survey, especially to the second section on host country medical capacities.

If you prefer to complete a hardcopy of the survey, please scan and email it to dos-dhmosh-public-health@un.org

* 1. This survey is submitted on behalf of which duty station?

* 2. Name and Job Title of Submitter

* 3. Organization/Department of Submitter

* 4. Email Address of Submitter

5. If you are not completing this on behalf of the entire duty station, which entity/organisation are you completing it for?

* 6. Are you completing this on behalf of a peacekeeping or political mission?

Yes

No

If Yes, please specify which mission:

* 7. Does your duty station have an in-house UN medical service?

- Yes
- No

Comment

Novel Coronavirus: Medical Capacities Review Survey for All Global UN Duty Stations

The following questions refer to in-house capacities within the UN

* 8. Does your duty station have an in-house UN health emergency preparedness and response plan that can address respiratory diseases including 2019-nCoV?

- Yes
- No

Comment

* 9. Are there in-house UN health care workers who can clinically diagnose and manage cases of UN personnel with severe acute respiratory infections?

- Yes
- No

Comment

* 10. Are there air ambulance services available to MedEvac UN personnel with severe acute respiratory infections out of the host country if necessary?

- Yes
- No

Comment

* 11. Are there in-house UN ambulance teams trained to transport UN personnel with severe acute respiratory infections?

Yes

No

Comment

* 12. Are there specific in-house UN health facilities that can provide clinical care to UN personnel with severe acute respiratory infections?

Yes

No

Other (please specify)

* 13. Are there any in-house UN health facilities designated to manage patients with 2019-nCoV infection?

Yes

No

Comment

14. How many patients with severe acute respiratory infection/distress needing ICU/ventilator care can you manage at the same time? And for each patient, how many days can you manage them?

* 15. Is Personal Protective Equipment (PPE) such as N95 masks, surgical masks, gloves, coveralls available for your in-house UN medical staff?

Yes

No

Comment

16. If yes, please specify the types of PPE available for your in-house UN medical staff, and what are its intended uses?

Novel Coronavirus: Medical Capacities Review Survey for All Global UN Duty Stations

The following questions refer to external medical capacities outside of the UN

* 17. Is your host country capable of conducting 2019-nCoV laboratory diagnostic tests?

Yes

No

Comment

18. If yes, what type of 2019-nCoV diagnostic tests are conducted in your host country?

* 19. What plans are put in place for having 2019-nCoV laboratory diagnostic tests available in your host country?

* 20. Does your host country have a national public health emergency preparedness and response plan that can address respiratory diseases including 2019-nCoV?

Yes

No

Comment

* 21. Are there non-UN medical teams in your host country that are trained in case management of severe acute respiratory infections?

Yes

No

Comment

* 22. Are there non-UN ambulance teams in your host country trained to transport patients of severe acute respiratory infections?

Yes

No

Comment

* 23. Are there non-UN specific health facilities in your host country that are assigned to provide care to patients with severe acute respiratory infections?

Yes

No

Comment

* 24. Are there any non-UN health facilities in host country designated to manage patients with 2019-nCoV infection?

Yes

No

Comment

* 25. What is the ICU capacity in the country?

* 26. Is Personal Protective Equipment (PPE) such as N95 masks, surgical masks, gloves, coveralls available for local host country's medical staff?

Yes

No

Comment

27. If yes, please specify the types of PPE available, and what are their intended uses for the local host country's medical staff?

28. Do you have any other comments or important information to share?
