This document provides a self-assessment checklist of minimum preparedness for duty stations located in countries and territories where the Aedes species mosquito is present, but where local transmission of Zika virus is not yet known to occur.

Country Teams and/or mission leadership in duty stations in Aedes-affected areas should review this checklist and ensure that the listed actions are implemented where applicable. Many of these actions necessitate close coordination with internal and external UN stakeholders, including the local PAHO/WHO office, as well as local/national health and environmental authorities.

For any questions on this document, please contact msdpublichealth@un.org.

### A  Planning and Coordination

Our UN country office/mission’s senior management is up-to-date and informed regarding the current Zika virus situation in affected countries and territories.

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>Partially</th>
<th>No</th>
</tr>
</thead>
</table>

Our UN country office/mission has systems in place for close coordination with relevant stakeholders on this issue if needed (e.g., PAHO/WHO office, national/local health and environment authorities, supporting health facilities/specialists, etc.)

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>Partially</th>
<th>No</th>
</tr>
</thead>
</table>

Our UN country office/mission is ready to convene a formal coordinating committee for Zika or an equivalent committee (e.g., SMT/CMT) for management of the situation as it relates to our personnel.

<table>

</table>

### B  Public Health and Medical Management

#### B1  Preparedness

Our UN country office/mission has assessed our internal medical and public health preparedness status related to Zika, GBS, and microcephaly, and has identified any actions needed to fill gaps to ensure protection of our personnel and their access to care.

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>Partially</th>
<th>No</th>
</tr>
</thead>
</table>

Our UN country office/mission is in contact with and in compliance with local public health and environmental advisories from the authorities.

**B2 Personal Protective Measures**

Our UN country office/mission has conducted information campaigns to raise awareness among UN personnel about mosquito bite avoidance and removal of breeding sites at home and the workplace.

- □ Yes
- □ Partially
- □ No

Our UN country office/mission has ensured that condoms are readily accessible to any UN personnel who requests them.

- □ Yes
- □ Partially
- □ No

**B3 Travel**

Our UN country office/mission has ensured that UN personnel who plan to travel into Zika-affected areas are familiar with the guidance in MSD’s “Health Risk Mitigation Plan for UN Personnel and Dependents” (available at https://hr.un.org/sites/hr.un.org/files/Zika_RMP%20for%20UN%20Staff_2016-02-18_Final_0.pdf).

- □ Yes
- □ Partially
- □ No

UN medical staff in our country office/mission have reviewed and are implementing MSD’s “Health Risk Mitigation Plan for UN Personnel and Dependents” (available at https://hr.un.org/sites/hr.un.org/files/Zika_RMP%20for%20UN%20Staff_2016-02-18_Final_0.pdf).

- □ Yes
- □ Partially
- □ No
- □ N/A

**B4 Vector Control**

Our UN country office/mission has provided advice to UN personnel on how to effectively eliminate or reduce mosquito breeding sites (e.g., empty, cover/and or dispose of containers that can hold water both inside and outside of buildings, and keep garbage in closed bags and containers). More information is available at https://hr.un.org/sites/hr.un.org/files/ZikaPersonalProtection_UN%20Staff_MSD_2016-02-09_EN_0.pdf.

- □ Yes
- □ Partially
- □ No

Our UN country office/mission has liaised with local environmental authorities and is in compliance with the local authorities' guidelines for mosquito control within UN premises.

- □ Yes
- □ Partially
- □ No

Our UN country office/mission has implemented relevant/applicable practices contained in MSD’s guidelines on “Best Management Practices for Mosquito Control Programs” (available at https://hr.un.org/sites/hr.un.org/files/Vector%20Control%20Advisory_MSD_2016-02-23_0.pdf).

- □ Yes
- □ Partially
- □ No

Procedures for UN aircrafts in our duty station are in compliance with standard WHO recommendations regarding disinsection. Further guidelines from the WHO on disinsection can be found at http://www.who.int/ihr/ports_airports/zika-aircraft-disinsection/en/.

- □ Yes
- □ Partially
- □ No
- □ N/A
Our UN country office/mission has identified if the following supplies could be needed for our duty station: mosquito repellents (containing 20-25% DEET), bed nets, permethrin, larvicides for treating standing water, ovitrap, pregnancy test kits, condoms, adulticides for outdoor fogging, adulticides for indoor residual spraying, and personal protective equipment for personnel who conduct fogging.

If identified supplies are currently unavailable in the local supply, our UN country office/mission has identified the best sources and has procured, or is in the process of procuring, the necessary quantities.

UN medical staff in our UN country office/mission are trained and have a plan in place for the diagnosis and management of potential cases of Zika, GBS and Zika-affected pregnancies.

UN medical staff in our UN country office/mission are familiar with the local health authorities’ protocols and have a plan in place for the collection and transport of clinical specimens, as well as arrangement of laboratory testing of suspected Zika cases if encountered in individuals returning from Zika-affected countries.

UN medical staff in our UN country office/mission have identified the capacity and capabilities of local health facilities and local medical specialists that can manage GBS and microcephaly cases, as well as the monitoring of fetal growth among pregnant women. All UN medical staff in our duty station are familiar with protocols for referrals to such health facilities or medical specialists.

Our UN country office/mission has pre-identified suitable medical evacuation centers for UN personnel with clinical needs that require evacuation out of the duty station.

UN personnel in our UN country office/mission are aware of where they can seek help if they have medical concerns related to Zika and its potential complications.
**B7 Reporting**

Our UN country office/mission and medical staff (if applicable) are familiar with the procedures for informing the country office/mission’s senior management, PAHO/WHO country office, and UN Medical Services Division (msdpublichealth@un.org) when a Zika, GBS, or microcephaly case is suspected or confirmed in individuals returning from Zika-affected countries.

**C Communications and Health Education**

Our UN country office/mission has distributed MSD’s advisory regarding mosquito bite avoidance (available at https://hr.un.org/sites/hr.un.org/files/ZikaPersonalProtection_UN%20Staff_MSD_2016-02-09_EN_0.pdf) to all UN personnel in our duty station.

All managers and UN personnel in the duty station are aware of where to obtain information concerning the latest Zika situation in various languages from WHO (http://www.who.int/topics/zika/en/) and PAHO websites (http://www.paho.org/hq/index.php?option=com_content&view=article&id=11585&Itemid=41688&lang=en), the local health authorities, and the Zika Virus HR Portal website (https://hr.un.org/page/zika-virus). UN personnel in our UN country office/mission know who they can contact if they have any Zika-related questions.
If you are submitting this assessment to MSD (msdpublichealth@un.org), please provide the following information:

Name of Person Completing Survey:

Title:

Organization/Dept./Office:

Duty Station:

Contact Email Address:

Contact Phone Number:

If you are not completing this survey on behalf of your entire duty station, please specify the UN entity you are responding for:
